

SUMMARY

Java Full Stack Developer with strong fundamentals in Core Java and hands-on experience in building scalable backend services using Spring Boot, REST APIs, Spring Security, and MySQL. Skilled in implementing JWT-based authentication, Role-Based Access Control (RBAC), and clean layered architecture. Currently enhancing skills in system design, API development, and problem-solving for SDE-1 roles.

EDUCATION

B.Tech in Computer Science

SATI Engineering College Oct 2022 – May 2026
CGPA: 7.4

Higher Secondary Education

Govt. Excellence School June 2020 – May 2022
Percentage: 68%

Secondary Education

Govt. Excellence School June 2018 – May 2020
Percentage: 90%

EXPERIENCE

Internship - Program Tactics SATI Vidisha

Role – Programming Intern 12/2023 – 01/2024

- Enhanced programming logic and problem-solving skills through 50+ structured coding exercises.
- Strengthened understanding of data structures algorithms and clean coding practices by applying them in real-time projects.
- Practiced writing modular and efficient code, improving debugging efficiency by 20%.

SKILLS

Languages: JAVA, JavaScript, SQL

Technologies/Frameworks: HTML5, CSS3, React, Bootstrap, Spring Boot, REST APIs, Spring MVC, Spring JPA, Spring Security

Developer Tools: VS Code, IntelliJ, Eclipse, Git, Github, Maven

Relevant Coursework: DSA, OS, DBMS, CN, SDLC, OPPs

CERTIFICATIONS

- Mastering Data Structure and Algorithms – Sheryians
- Java Programming – Sheryians
- Software Engineering Job Simulation - JP Morgan Chase Co

INTEREST

- Cricket

PROJECTS

Banking System

Jan 2025

Technologies: React, Java, Spring Boot, MySQL, JWT

GitHub: View Project

- Developed a **full-stack banking system** enabling secure account management, transaction processing, and real-time balance tracking.
- Built a responsive frontend using **React.js, HTML, CSS, and JavaScript** to provide a seamless user experience.
- Designed and implemented **RESTful APIs** using Spring Boot and Spring Data JPA for core banking functionalities.
- Implemented **JWT-based authentication** and Role-Based Access Control (RBAC) using Spring Security for secure access.
- Optimized database performance using **query tuning and pagination**, and implemented global exception handling.

E-Commerce Backend Platform

Jan 2026

Technologies: React, Spring Boot, REST APIs, JPA

- Developed a **full-stack e-commerce platform** enabling seamless product browsing, cart management, and secure checkout with a responsive user interface.
- Built dynamic and interactive frontend using **React.js, HTML, CSS, and JavaScript**, improving user experience and application performance.
- Designed and implemented **RESTful APIs** using Spring Boot to handle business logic, order processing, and user management efficiently.
- Integrated frontend with backend services using **REST APIs**, ensuring smooth data flow and real-time updates across the application.
- Implemented **JWT-based authentication and authorization** using Spring Security to secure user data and admin functionalities.
- Managed database operations using **MySQL**, including schema design, query optimization, and data consistency.
